Contents

Allerberger F → Zangerle R
Antinori A → Tamburrini E
Apperloo-Renkema HZ, Wilkinson MHF, Oenema DG, van der Waaij D: Objective quantitation of serum antibody titres against *Enterobacteriaceae* using indirect immunofluorescence, read by videocamera and image processing system 93
Arora SK, Sinha R, Sehgal S: Use of in vitro method to assess different brands of anti-leishmanial drugs 21
Asai J → Fujii Y
Autenrieth I, Hantke K, Heesemann J: Immunosuppression of the host and delivery of iron to the pathogen: a possible dual role of siderophores in the pathogenesis of microbial infections? 135

Bailey CJ → Fleischer B
Beeken W → Meyer D
Berlutti F → Passariello C
Beutin L: The different hemolysins of *Escherichia coli* 167
Beyer J → Caspari G
Buchan A → Skinner GRB
Buslau M → Hänel H

Carballo J, Ferreirós CM, Criado MT: Importance of experimental design in the evaluation of the influence of proteins in bacterial adherence to polymers 149
Caspari G, Beyer J, Richter K, Gerlich WH, Schmitt H: Prevalence of antibodies to recombinant hepatitis C virus protein C100-3 and of elevated transaminase levels in blood donors from Northern Germany 261
Chowdhury IH, Koyanagi Y, Takamatsu K, Yoshida O, Kobayashi S, Yamamoto N: Evaluation of anti-human immunodeficiency virus effect of recombinant CD4-immunoglobulin in vitro: a good candidate for AIDS treatment 183
Criado MT → Carballo J
Czeglédy J, Evander M, Veres L, Gergely L, Wadell G: Detection of transforming gene regions of human papillomavirus type 16 in cervical dysplasias by the polymerase chain reaction 37
Czeglédy J, Rogo KO, Evander M, Wadell G: High-risk human papillomavirus types in cytologically normal cervical scrapes from Kenya 321

De Bac C → Taliani G
De Luca A → Tamburrini E
de Luca M → Passariello C
Dierich MP → Zangerle R
Doerr H-W → Hamann A

Eiffert H, Lotter H, Jarecki-Khan K, Thomssen R: Identification of an immunoreactive non-proteinaleous component in *Borrelia burgdorferi* 229
Eis-Hübinger AM → Sienko S
Engelhard E, Kroppenstedt RM, Mutters R, Mannheim W: Carbohydrate patterns, cellular lipoquinones, fatty acids and phospholipids of the genus *Pasteurella* sensu stricto 79
Evander M → Czeglédy J

Fabian J → Meyer D
Ferreirós CM → Carballo J
Fink C → Skinner GRB
Fleischer B: T lymphocyte-stimulating microbial toxins as "superantigens" 53
Fleischer B, Bailey CJ: Recombinant epidermolytic (exfoliative) toxin A of *Staphylococcus aureus* is not a superantigen 273
Francisci D → Taliani G
Fritsch P → Zangerle R
Fujii Y, Yokochi T, Nakashima I, Asai J, Kato N: A new mouse model for autoimmune orchitis 1

Gardner W → Skinner GRB
Gergely L → Czeglédy J
Gerlich WH → Caspari G
Gerlich WH → Yoshida CFT
Gump D → Meyer D

Hänel H, Kalisch J, Keil M, Marsch WC, Buslau M: Quantification of keratinolytic activity from *Dermatophilus congolensis* 45
Hallworth J → Skinner GRB
Hamann A, Doerr H-W: IgG subclass-specific antibodies to human cytomegalovirus (HCMV)-induced early antigens 193
Hantke K → Autenrieth I
Hartley C → Skinner GRB
Heesemann J → Autenrieth I
Heesemann J → Mack D
Hellmann E → Moser I

Jarecki-Khan K → Eiffert H

Kalisch J → Hänel H
Kansal R, Khuller GK: Detection of mannophosphoinositide antigens in sputum of tuberculosis patients by dot enzyme immunoassay 73
Kato N → Fujii Y
Keil M → Hänel H
Khuller GK → Kansal R
Kleim J-P → Sandhoff T
Kobayashi S → Chowdhury IH
Koyanagi Y → Chowdhury IH
Kroppenstedt RM → Engelhard E

Lotter H → Eiffert H
Lütticken R → Podbielski A

Mack D, Pulz M, Heesemann J: Recognition by peptide mapping of three different structural groups of outer membrane protein YOP-1 of *Yersinia enterocolitica* and *Yersinia pseudotuberculosis* 205
Maiuro G → Tamburrini E
Mannheim W → Engelhard E
Marsch WC → Hänel H
Mathai A → Radha Krishnan VV
McLeish P → Skinner GRB
Melling J → Skinner GRB
Melzer B → Podbielski A
Meyer D, Gump D, Fabian J, Beeken W: 140-MDa plasmids of *Escherichia coli* and *Shigella flexneri* 5 do not influence phagocytosis 143
Montecucco C → Padovan E
Moser I, Schröder WFKJ, Hellmann E: In vitro binding of *Campylobacter jejuni/coli* outer membrane preparations to INT 407 cell membranes 289
Mutters R → Engelhard E

Nakashima I → Fujii Y

Oenema DG → Apperloo-Renkema HZ
Ørskov F, Ørskov I: Antibodies against core and O antigen epitopes of *Escherichia coli* O83 in rabbit antisera and in commercial human immunoglobulin 157
Ørskov I → Ørskov F
Ortona E → Tamburrini E

Padovan E, Papini E, Rappuoli R, Montecucco C: Determination of diphtheria toxin neutralizing antibody titers with a cell protein synthesis inhibition assay 29
Papini E → Padovan E
Pâques E → Römisch J

Passariello C, Thaller MC, Selan L, Berlutti F, de Luca M, Renzini G: Periodontal regeneration procedures may induce colonization by glycocalyx-producing bacteria 67
Podbielski A, Melzer B, Lütticken R: Application of the polymerase chain reaction to study the M protein(-like) gene family in beta-hemolytic streptococci 213
Pohl P → Zangerle R
Pulz M → Mack D

Radha Krishnan VV, Mathai A: Isolation of two antigens from the culture filtrates of *Mycobacterium tuberculosis* and their applications in the laboratory diagnosis of the tuberculous meningitis 101
Rapicetta M → Taliani G
Rappuoli R → Padovan E
Renzini G → Passariello C
Richter K → Caspari G
Römisch J, Pâques E: Annexins: calcium-binding proteins of multi-functional importance? 109
Rogo KO → Czeglédy J

Sandhoff T, Kleim J-P, Schneweis KE: Latent human herpesvirus-6 DNA is sparsely distributed in peripheral blood lymphocytes of healthy adults and patients with lymphocytic disorders 127
Sarrecchia B → Taliani G
Schatzmayr HG → Yoshida CFT
Schmitt H → Caspari G
Schneweis KE → Sandhoff T
Schneweis KE → Sienko S
Schröder WFKJ → Moser I
Sehgal S → Arora SK
Selan L → Passariello C
Sienko S, Eis-Hübinger AM, Schneweis KE: The role of free radical scavengers, inhibitors of prostaglandin synthesis, and hypomethylating agents in reactivation of latent herpes simple virus 249
Sinha R → Arora SK
Siracusano A → Tamburrini E
Skinner GRB, Fink C, Melling J, Wiblin C, Thornton B, Hallworth J, Gardner W, McLeish P, Hartley C, Buchan A: Report of twelve years experience in open study of Skinner herpes simplex vaccine towards prevention of herpes genitalis 305
Soares OA → Yoshida CFT
Stagni G → Taliani G

Takamatsu K → Chowdhury IH
Taliani G, Rapicetta M, Francisci D, Xiang J, Sarrecchia B, De Bac C, Stagni G: Cor-

relation of preS antigens and clinical status during chronic hepatitis B virus infection 239
Tamburrini E, De Luca A, Ventura G, Maiuro G, Siracusano A, Ortona E, Antinori A: *Pneumocystis carinii* stimulates in vitro production of tumor necrosis factor-α by human macrophages 15
Thaller MC → Passariello C
Thomssen R → Eiffert H
Thornton B → Skinner GRB

Uy A → Yoshida CFT

van der Waaij D → Apperloo-Renkema HZ
Ventura G → Tamburrini E
Veres L → Czeglédy J

Wadell G → Czeglédy J
Wiblin C → Skinner GRB
Wilkinson MHF → Apperloo-Renkema HZ

Xiang J → Taliani G

Yamamoto N → Chowdhury IH
Yokochi T → Fujii Y
Yoshida CFT, Soares OA, Schatzmayr HG, Uy A, Gerlich WH: Early appearance and biphasic kinetics of IgG antibody against hepatitis C virus protein C100-3 279
Yoshida O → Chowdhury IH

Zangerle R, Allerberger F, Pohl P, Fritsch P, Dierich MP: High risk of developing toxoplasmic encephalitis in AIDS patients seropositive to *Toxoplasma gondii* 59

Indexed in *Current Contents*
